Your road, **your choice**

Your road, **your choice**

**Our** history

From the World Road World Championship in 1977 to the Hour Record in Mexico City in 1984, Francesco Moser's life has been a constant race, marked by as many sacrifices as triumphs, and always in pursuit of new personal and technological achievements. His vision is at the heart of our work.

**“Opening new roads has always seemed to be my destiny, right from the start.”**

- Francesco Moser

Francesco Moser and Ignazio Moser.

Competence, passion, ambition, and courage are essential ingredients in the development of an innovative product. Francesco's challenges and triumphs inspired our bicycle, which is the result of his expertise and vision.

1

**Dual Mode System.**

The Dual Mode System allows you to switch bike configuration in less than five minutes. With our patented system, you can quickly and easily remove the battery and replace the motorized wheel with a normal one.

2

**Frame set-up.**

Endurance for increased comfort. The feeling is of a stable bike with a more relaxed riding position, ideal for long distances. This is the result of a geometrical design with a more open steering angle and longer wheelbase, combined with compact chainstays, to maintain responsiveness.

4

**Wireless shift.**

The wireless electronic shift is smoother, faster and more precise than a traditional gearshift.

3

**Drive unit.**

FSA HMI Hub Motor with 42 Nm torque and a battery capacity of 250 Wh. The motor has five levels of assistance. A remote control integrated into the top tube, an easily accessible charging port above the bottom bracket, and an additional 250 Wh battery that can be placed in the bottle cage round out the system.
